Subject Index to Volume 16, 1997

1-Aminocyclopropane-1-carboxylic acid (ACC) 129
ABA catabolism 57
ABA synthesis 57
Abscisic acid 115, 181
Abscissic acid 11
Abscission 7
ADC 205
Additives 63
Agrostis palustris 73
Alstroemeria 219
Amino acid 239
L-AOPP 89
Aromatic metabolism 147
Auxin 95, 239
Avena 11
Avena fatua 27

Bean petiole 7
Begonia 189
Bisphosphonates 153
Brassica napus L. 47

Capsicum annuum 129
Carbohydrate allocation 35
Cell culture 137
Cell division 89
Cell elongation 89
Cell expansion 69
Cherry tomato 245
Chilling treatment 57
Chlorocholine chloride 137
Chlorogenic acid 43
Chlorophyll 219
Chlorophyllase 169
Chloroplast 1
Chlorsulfuron 1
Compensatory growth 123
Competition 27
Cotton fiber 181
Cotton ovule 181
Cycocel 245
Cytokinin starvation 89
Cytokinin 169, 181

Defoliation 123
Dianthus caryophyllus 169
Diclofop 233
Drought 63, 233
Dry matter 21

Embryo dormancy 57
Endogenous GAs 189
EPSP synthase 147
Ethylene biosynthesis 115
Evolution 95

Fenoxaprop 63, 233
Flamprop 233
Flavanoids 43
Flowering 79, 115
Fusicoccin 69
Fusicoccin-like ligands 109

GA application 189
GC-MS 219
Gene expression 95
Germplasm maintenance 227
Gibberellic acid 123, 245
Gibberellin metabolism 79
Gibberellin 35, 115, 137
Gibberellins 219
Glucose 141
Glutathione *S*-transferase 95
Glycine max 89
Glyphosate 147, 153
Growth inhibition 227
Growth retardants 79, 197, 227
Growth 11, 79
Helianthus annuus L. 205

Herbicides 147
Hormonal effects 159
Humidity 233
Hyoscyamuus muticus 159

Imazamethabenz 63, 233
Indole-3-acetic acid (1AA) 129
Indole-3-acetic acid 115
Indoleacetic acid 7
Internode 11

Jasmonic acid 11

Kalmia 197

Lactuca sativa 141
Leaf age 219
Lepidimoide 7
Lycopersicon esculentum 43

Maize endosperm 137
Maturation 27
MCPA 63

Mitochondria 1
Mixtalol 47
Multiple stress 233
Mutant 69, 181

1-Naphthaleneacetic acid (NAA) 129
Nitrate 141
Nitrogen fertilizer 47
Nucleolus 1

ODC 205
Oryza sativa 239
Oxidative stress 95

Paclobutrazol 35, 197, 213, 215
Paprika 129
Pharbitis nil Chois 115
Phaseolus vulgaris 7, 123
Phenolic compounds 89
Phosphorus 27
Photoperiod 189
Photosynthetic pigments 169
Physiological characteristics 47
Phytotoxicity 63, 173, 233
Pistachia chinensis 213
Pisum sativum 1
Plant growth regulator 21
Plant growth regulators 73
Poa annua 73
Polyamine biosynthesis inhibitors 205
Polyamines 89, 205
Protein 137
Pulvinus 11
N-Pyridylaminomethylenebisphosphonic acids 147

Radioimmunoassay 109
Radioreceptor analysis 109
Rhododendron 197
Rice seedling growth 35
Rice seedling morphology 35
Rice 239
Ricinus communis 215
Roots 159

Salt stress 205
Seed dormancy 27
Seed germination 141
Seedling quality 35
Senescence 219
Shikimate pathway 153
Signal transduction 95
Silverleaf whitefly 245
Skotodormancy 141
Solanaceae 43
Starch 137
Stem elongation 189, 197
Sucrose 141
Sweetpotato 227

Temperature 63, 233
Thermoperiod 189
Tiller removal 173
Tiller 21
Tillering 79, 173
Tissue culture 227
Tomato irregular ripening 245
Tomato 43, 69
Translocation 173
Triticum aestivum 21

Ultrastructure 1
Uniconazole 197

Waterlogging 47
Wild oat 233

Yield component 21

Zea mays 137
Zinc 239
